

**Item P19-1171**

**Colony Combination Blade**

Thanks to a new technology in diamond blade design and manufacturing, we now have a blade that can cut just about every construction material including plastic, wood, metal, masonry, stone, concrete, glass, tile and asphalt (see Performance Rating Chart Below). If you are cutting a variety of materials, this blade will not only perform well, but eliminates the need to change blades. The Combination Blade is lighter in weight than carbide blades and lasts more than 40 times longer than abrasive blades. Perfect for general construction, rescue and demolition.

**Combination Blade Performance Ratings Chart**

Item	Description	Attributes
19-1171		<b>Size:</b> 4 1/2" <b>Recommended Tool(s):</b> Angle Grinders
19-1398		<b>Size:</b> 6" <b>Recommended Tool(s):</b> Circular Saws
19-1173		<b>Size:</b> 7" <b>Recommended Tool(s):</b> Circular Saws
