**Item P10-2874**

**Concrete Electric Vibrators**

Designed to perform to rugged jobsite conditions. Super tough cast aluminum motor housing. A rugged shock-absorbing frame protects the housing while acting as a convenient carrying handle for the unit. Watertight, strain relief power cords take all kinds of abuse on the job and power switches are protected by the frame. The vibrator heads themselves are factory sealed and require no maintenance. Units may be configured to drive alternate brand shafts and heads. All electrical systems are UL approved.
