

**Item P14-1090**

**Construction Tuxes by Guardian**

The patented Tux combines the safety of a full-body harness with the comfort and practicality of a worker's vest. Back D-ring and side positioning rings come standard. Leg straps and D-rings are tucked inside vest when not needed. Hand and chest pockets are large and easily accessible. Tool belts attach easily through D-ring slots and back loop. Pass thru buckles are notched for easy and safe connection. The Tux eliminates valuable down time since it is a product your workers will wear even when they are not tied off. Meets all applicable OSHA, ANSI, and CSA standards. Available in the following materials: Black Mesh, Orange Mesh, Blue Duck with Fleece Lining, and Hi-Vis that meets the reflective requirements for ANSI/ISEA 107-99 Class 1 and Class 2 roadside work (eliminates having to wear standard harnesses over reflective garments). **The Tux can be purchased separately, or as kit. Each Kit comes with a large, durable carrying bag and a 6' Internal Shock Absorbing Lanyard.**

Item	Description	Attributes
