

**Item P19-2051**

**DeWalt 10,000W Forced Air Electric Construction Heater**

Thermostatically controlled electric heater operates at 10,000 watts on a 240v single phase circuit. As a convenience, this heater can also be used at 7000 watts depending on which size circuit is available on your particular jobsite. Constructed with dual coil supports oversized ergonomic handle and very durable jobsite construction.
