

Item P10-1330

DeWalt Heavy-Duty Reciprocating Saw

Features DeWalt's keyless blade clamp system which allows the user to change blades by lifting a lever on the side of the saw eliminating the need to touch the reciprocating shaft. The keyless blade clamp releases the blade in seconds. Counter balance minimizes vibration. Push button adjustable shoe. Variable speed can be altered with a speed dial which allows for cutting a variety of materials. Orbital action delivers fast cutting for wood applications. Includes carrying case.
