

Item P10-4092
Diamond Plated Routers

Features a tough, durable bond with a single layer of diamond adhesive. Ideal for routing highly abrasive materials. When used with a straight die grinder, it allows the cutting out of mortar joints that are too thin or too difficult to reach with an angle grinder. **We recommend using a Metabo GE700 Die Grinder with these bits ([see Item 10-1231](#)).**

Item	Description	Attributes
10-4090		Head Dia.: 1/8" Length of Diamond: 1" Shank Dia.: 1/4" Overall Length: 2 1/2"
10-4092		Head Dia.: 1/4" Length of Diamond: 1" Shank Dia.: 1/4" Overall Length: 2 1/2"
