Item P15-3044

DrilFlex® Structural Fasteners

Specially designed to help alleviate hydrogen-induced brittle failures, DrilFlex self-drilling fasteners are formed from a special steel alloy and combine a high hardness drill point for easy and reliable drilling and tapping with a lower-hardness shank and head for increased ductility. Patented Stalgard® finish provides corrosion resistance far superior to conventional finishes. DrilFlex is designed for use in a wide variety of environments involving structural or high-stress connections and dissimilar materials. For additional technical information on DrilFlex, call your Colony representative for a complete catalog and submittal package. **Please note: DrilFlex is sold in box quantities only.**

Item	Description	Attributes
15-3044		Model: AF641 Size: 12-14 x 1" Head Style: HWH #3 point Applications: Steel & Aluminum Qty. Per Box: 4,000
15-3045		Model: AF681 Size: 12-14 x 1 1/2" Head Style: HWH #3 point Applications: Steel & Aluminum Qty. Per Box: 2,500
15-3047		Model: AF876 Size: 1/4"-20 x 1 1/2" Head Style: HWH #4 poin Applications: Steel & Aluminum Qty. Per Box: 2,000
15-3048		Model: AF890 Size: 1/4"-20 x 2 1/2" Head Style: HWH #4 point Applications: Steel & Aluminum Qty. Per Box: 1,000
15-3043		Model: BL215 Size: 12-14 x 1" Head Style: Undercut Flat Head #3 Applications: Steel & Aluminum Qty. Per Box: 4,000

Other sizes & styles of DrilFlex Structural Fasteners Available. Ask your Colony Representative for more information.
