

Item P13-0016

300 Compact Threading System

Lightest, most portable 2" capacity threading machine manufactured. Combined with the Model 250 Folding Wheel Stand, the 300 Compact becomes a totally portable 160 lb. threading machine (especially compared to the standard 300 machine which weighs 212 lbs. and is not very mobile or portable). The 300 Compact is also versatile: The optional Model 916 Roll Groover Adapter Bracket accepts the 300 Power Drive version of the Model 916 and allows grooving of 2"-6" pipe. An integral through-the-head self-oiling system eliminates the need for an oil pan and pump while a reservoir seal prevents spills during transport.

Standard equipment includes Model 250 Folding Wheel Stand, one 811A Universal Die Head, one 344 Reamer, one 360 Cutter and Cutter Wheel, one set of 1/2"- 3/4" NPT dies, one set of 1"-2" NPT dies and one gallon of Nu-Clear Threading Oil.
