

Item P15-2043

Grip Rite House-Wrap

Grip-Rite weather resistive barriers are made of a durable high density polyethylene woven substrate that possesses very high tensile strength that resists the tearing that results from high wind exposure. Superior UV treatment allows exposure for over six months without deterioration. Grip-Rite House-Wrap are coated on both sides with LDPE. Grip-Rite House-Wrap-E is coated on one side. Suitable for a wide range of climates. Minimizes air infiltration, allowing exterior walls to have a higher insulation performance. Permits moisture to escape the stud wall, preventing damage to the interior wall cavity. Prevents bulk water intrusion, protecting the sheathing and stud wall components. 9' x 100'.
