

**Item P10-0288**

**Guardian Series 3 Construction Harness**

Premium fall protection harness designed for workers who carry tools. Stretch ability in the shoulders allows for comfort in movement. Padded shoulder pads and a comfortable back support pad are both made of a moisture wicking material. The padding provides cushiony support and distributes the load of the harness and tools equally. SureGrip™ strap adjusters make this the fastest and easiest harness on the market to adjust and fit. Belt loops to accommodate tool belt included, along with side handles for holding tools. D-rings on sides for positioning. Tongue buckle style leg and waist straps. Attractive red polyester webbing. While the standard size will fit most workers (medium-large), an XL size is available. **The Seraph Construction Harness can be purchased separately, or as a kit. Each Kit comes with a large, durable carrying bag and your choice of two different lanyards: a 6' Internal Shock Absorbing Lanyard or a Stretch Lanyard that expands from 4 1/2' to 6'.**
