

Item P14-1252

Guardian Web Horizontal Lifeline

Guardian's Web HLL is a lightweight horizontal lifeline solution that accommodates up to two workers, and features a unique toolless tensioning mechanism for quick and accurate installation. Simply attach the Web HLL to compatible anchorage connectors (6' cross-arm straps included), take up the slack, and tension using the built-in handle. When the tension indicator shows green, you are ready to work. The Web HLL's advanced integrated shock absorber and 1.5" web lifeline assembly work together to keep deflection to a minimum, lowering overall fall clearance requirements. **Kit includes: Web Horizontal Lifeline with 2x o-rings, 2x cross arm straps, tool tether, and carry bag.**
