

Item P10-3262

High Performance Portable Band Saw Blade

M.K. Morse patent pending high performance Bi-Metal portable band saw blades delivers exceptional performance and most cuts per blade on the market. These high performance bi-metal portable band saw blades are the only two blades you'll need for the range of materials cut with this tool. They cut up to 2X faster and last up to 2X longer than conventional portable band saw blades. The Morse 811 outperforms 10/14 blades for cutting materials ¼" and thicker. The Morse 1216 outperforms 18 tooth blades when cutting materials 316" and thinner. Save money by using fewer blades and reduce inventory. Quick, clean cuts in a variety of material. Cuts everything you do with one blade; even stainless steel. Made in the USA. 3 per pack.

Item	Description	Attributes
10-3262	811 High Performace Band Saw Blade	Teeth per Inch: 8/11 Length: 44-7/8" Application: Heavy wall materials – ¼" + Width x Thickness: 1/2" x .020"
10-3309	811 High Performace Band Saw Blade	Teeth per Inch: 8/11 Length: 35-3/8" Application: Heavy wall materials – ¼" + Width x Thickness: 1/2" x .020"
10-3267	1216 High Performace Band Saw Blade	Teeth per Inch: 12/16 Length: 44-7/8" Application: Thin wall materials – 3/16" or less Width x Thickness: 1/2" x .020"
10-3268	1216 High Performace Band Saw Blade	Teeth per Inch: 12/16 Length: 35-3/8" Application: Thin wall materials – 3/16" or less Width x Thickness: ½" X .020"
10-3272	1216 High Performace Band Saw Blade	Teeth per Inch: 12/16 Length: 32 - " Application: Thin wall materials – 3/16" or less Width x Thickness: ½" X .020"
