

**Item P71-0913**

**Hougen Low Profile Magnetic Drill - HMD130**

This ultra-low profile drill (also known as a "football drill") is the perfect solution for drilling holes in tight spaces. A patented quill feed arbor eliminates gibs and slide/way adjustments. Handles operate from either side. Remove the handle, and the hex head allows use of a socket wrench for ratcheting the feed. Two stage magnet. Engages full power only when motor is turned on which increases magnet life. Rear mounted controls optimize ergonomics. Carrying Case Included. **Please note: Uses [Hougen RotaLoc™ Annular Cutters with Quick-Release Shanks](#). See [Selection Guide for additional drill specifications](#).** Model HMD130.
