

Item P10-0602

Jobmaster® Chests

Jobmaster® Chests feature a full-length piano hinge, staked and welded to resist break-in attempts. 16 gauge steel construction. The seams are fully arc-welded and channels are added to the cover for extra strength. Formed ribs add strength to the ends and the front of the tool box. Overlapping cover design provides weather protection and resistance to entry. The three inch high, 12 gauge skids raise the unit for fork lifting and are pre-punched for easy installation of casters. Watchman® IV Lock System standard with each model; only 1 padlock required. Accepts Masterlock #1 or #5 padlocks.

Recommended [Caster Set](#): Any size caster will fit. Choose best load rating for your application.
