Item P23-0097

Kestrel DROP D2 Heat Stress Monitor

Built to Kestrel's brand specific rugged durability standard, the Kestrel DROPs are waterproof (IP67 standard can be submersed in 1M of water for 30 minutes) and drop-tested to MIL-STD-810G. Users may set threshold alarms where an in-app pop-up will notify a user in range that certain measurement criteria have been met. View, chart, record and monitor your environmental conditions: including temperature, relative humidity, heat stress index, and dewpoint temperature.

FEATURES:

Real time, Wireless, Graphing functionality
Access real time or chart the data via Bluetooth Low Energy (BLE) on a smart device
Log options: 2s, 5s, 10s, 20s, 30s, 1min, 2min, 5min, 10min, 20min, 30min, 1hr, 2hr, 6hr, 12hr
Range of 100' for iPhone connection
Share real-time/logged data with Kestrel Connect app via email, text, and social media.
Battery life of up to six months to one year
Humidity does NOT need to be calibrated over time
