

Item P11-8269

Makita 1" AVT® SDS-PLUS Rotary Hammer w/ HEPA Dust Extractor (D handle)

8 AMP motor that delivers 1.6 ft.lbs. of impact energy to handle the most demanding applications. Anti-Vibration Technology (AVT®) is an internal counterbalance system that greatly reduces vibration. The built-on dust extractor captures concrete dust during drilling and is activated by the tool for operator convenience. Efficient HEPA filtration system captures 99.97% of particulates .3 microns and larger. Dust container is transparent and provides an accurate level indicator of collected material. The 3-mode operation offers "rotation only", "hammering with rotation" or "chipping only" for multiple applications. The ergonomic D-shaped handle with a rubberized soft grip provides increased operator comfort, as well as a retractable tool hook to secure the tool to studs, ladders, and rails when not in use. Depth stop adjustment allows drilling up to 7-7/16" deep for increased capacity. 40 bit angle settings allow the bit to be set at different positions for operating convenience. **Includes: HEPA filter, dust extractor attachment with HEPA filter, side handle and depth rod.**

Specifications	
Amps	8
No Load Speed	0 - 1,100 RPM
Blows per Minute	0 - 4,500 BPM
Impact Energy	1.62 ft-lbs.
Blows per Minute	0 - 4,500 BPM
Capacity (concrete drilling)	1"
Optimum Range (concrete drilling)	1/4" - 5/8"
Max. Hole Depth	7-7/16"
Max. Capacity (concrete drilling w/ core bit)	3-1/8"
Tool Length	18-7/8"
Tool Weight	9.7 lbs.
