

Item P19-2052

Makita 14" Power Cutter

Makita 14" Power Cutter is engineered for industrial performance but with less weight at only 19.6 lbs. The compact and efficient EK6101 is powered by a 61cc engine with a full 4.4 HP for the most demanding concrete cutting applications. It's engineered to start easier and vibrate less. It also has innovative features like Stratified Air Scavenging (SAS) that recovers up to 75% of unburned fuel to reduce fuel consumption, and a cyclonic air intake that discards larger debris for increased air filter life and less maintenance. An ideal cutting solution for metal decking, angle iron, I-beams, cast iron pipe, brick/masonry, stone/concrete blocks, railroad rails, road curbs, and asphalt. Blade sold separately. Includes: universal wrench, torx wrench, screwdriver, adapter ring (20mm to 1").

Specifications	
Engine Displacement (cu.in./cc)	3.7 cu.in. (61 cc)
Engine (max power)	4.4 HP/3.2 kW
No Load Speed/Max. Spindle Speed	9,850 / 4,400 RPM
Fuel Tank Capacity	23.6 oz
Fuel Mixture	50:1
Max. Cutting Depth	5-1/8"
