Maxis® Grips™ Pulling Heads

Increased efficiency with 2-minute head preparation. Dual lock pulling system using both cam lock head and a double braided wire to quickly secure cable to rope without the fear of losing a conductor. Each double lock Maxis® Grips™ head rated at 4,000 lbs. Disconnect wire from pulling heads in 2 minutes without cutting the wire. No cutting, stripping or weaving of wire to make pulling head. Easily moves through conduit and around 90° bends. Staggered lengths for easier movement. Complete set (20 grips) for 1/0 – 750MCM Wire. **Includes: medium and large pulling jacket, large and small rope swivel and carrying bag.** Manufactured by Southwire.
