

Item P10-1594

Milwaukee 7" Universal Surface Grinding Dust Shroud

Milwaukee® Universal Grinder Dust Shrouds work universally across most professional brands, while competitors shrouds are proprietary to their own grinders. The Milwaukee® shrouds feature a durable and lightweight design with a convenient clear window for easy navigation. The purpose of grinder shrouds is to reduce exposure to dangerous debris, crystalline silica, and dust particles that can cause health issues for users who work with stone and concrete.
