

Item P11-7993

Milwaukee Laser Distance Meter

Milwaukee® Laser Distance Meters are designed to provide the easiest measurements from all orientations, and feature an array of new functionality. Color screens offer maximum visibility in low light conditions. Each features a simplified user interface that has been designed from the ground up for fast navigation so users can quickly choose their function and take a measurement with minimal downtime. Laser Distance Meters offer several different measurement functions that allow users to add and subtract values and calculate linear distance, surface area, total area, and volume. In addition, each tool includes memory storage for 30 readings and impact-resistant overmold for protection from tough jobsite conditions. Milwaukee® Laser Distance Meters also feature a side shot button for an easier, more ergonomic experience when measuring in all directions.

Item	Description	Attributes
