Milwaukee M18™ FORCE LOGIC™ 2"-3" ProPEX® Expansion Tool Kit

The M18™ FORCE LOGIC™ 2" - 3" ProPEX® Expansion Tool combines with the M12™ and M18™ ProPEX® Expansion Tools to deliver the industry's most consistent commercial installations. Its powerful hydraulic system expands up to 3" Uponor® PEX pipe, and like its M12™ and M18™ predecessors, features an auto-rotating head that expands pipe uniformly and maximizes installation speed. A single trigger pull initiates the tool to rotate, expand, and reset automatically, ensuring consistency across the entire installation. Finally, its intelligent design provides the user optimum balance in overhead connections and can also be flipped over to sit squarely on a table-top for extended use on site or in the shop. **Includes: M18™ FORCELOGIC™ 2" - 3" ProPEX® Expansion Tool, 2-1/2" ProPEX® Expansion Head, (2) M18™ REDLITHIUM™ HIGH DEMAND™ 9.0 Battery Pack, 2" ProPEX® Expansion Head, M18™ & M12™ Multi-Voltage Charger, 3" ProPEX® Expansion Head, Carrying Case, Side Handle, and 150g ProPEX® Expander Cone Grease.**

Specifications	
Model #	2633-22HD
Capacity	2", 2-1/2", and 3"
Max Length	14.5" (with 3" Expansion Head)
