Milwaukee M18™ FORCE LOGIC™ 600 MCM Cu Crimper Kit w/ 750 MCM Expanded Jaw

Milwaukee M18™ FORCE LOGIC™ 600 MCM Cu Crimper Kit w/ 750 MCM Expanded Jaw is the Most Accurate Way to crimp. The crimper produces cULus classified crimps according to the UL 486A-B classification standards for #8 - 750 MCM Copper & Dual Rated Anderson, Blackburn® Burndy, IlSCO, Panduit, Penn-Union and Thomas & Betts Connectors. The copper crimper uses MILWAUKEE® U Style Dies that feature vivid wire size markings and industry-standard color markings. The crimper dies also imprint wire size onto the connector after crimp completion. The crimper is made for commercial electricians and is designed to provide you with ease of use and easy inspection. The crimper jaw design holds the connector for instant alignment while Predictive Force Monitoring (PFM™) allows you to reach proper pressure on every crimp. PFM™ actively measures pressure and automatically modifies all performance levels of the system. This allows the high-speed hydraulic pump to power through the beginning of a cycle and land at precisely the right pressure, protecting internal components, to complete the crimp. Features ONE-KEY™ Technology, enabling you to store real-time crimp data, generate professional reports, view historical tool performance data and sync it all wirelessly to the cloud for easy access.
