Item P80-0128

Non-Ferrous Metal Cutting Blades

Specially designed carbide and blade geometry for cutting relatively thinwalled aluminum and non-ferrous extrusions and frames. Also designed for cutting copper, brass and other non-ferrous metals, and will work on plastics and wood if necessary. We highly recommend using a coolant or blade wax with these blades. **TCG Grind Please note: NEVER attempt to cut ferrous metals (steel, iron, etc.) with these saw blades.**
