

**Item P12-1140**

**Polarity Cube Circuit Tester**

Plug and test with ease. This unit is used to troubleshoot 120V AC grounded outlets. Designed to work with typical 3-wire NEMA 120 volt receptacles. Light sequence gives a visual indication of correct/incorrect wiring. Ergonomically designed to fit comfortably in the hand for hours of testing. The GT-10GFI works with GFI outlets and confirms that the ground fault outlet is working properly. Independently tested to UL's protocol 1436. Manufactured by Greenlee.
