Item P26-0211

Por-Rok® Aqua Plug™

Durable water resistant hydraulic cement which sets in 3 to 5 minutes. Just add water and mix. Designed to stop leaks or running water, patch cracks and fill holes in masonry surfaces. For interior or exterior surfaces. Achieves a compressive strength of 1,250 psi after 20 minutes and increases to 4,500 psi after 28 days. 1 lb. of Aqua Plug fills approximately 12 cubic inches.

Item	Description	Attributes
