

Item P14-1746

Power Snappy Motorized Work Platform

The Power Snappy can easily be transported in a small SUV or pickup. The M Model is light enough and small enough to be transported by two people. Can move from floor to floor on multi-story buildings, even when no elevator is available, something impossible for a scissor lift to do. Manpower productivity is enhanced over stepladders and standard scaffold in many cases, by reducing the time wasted moving devices and climbing up and down. Platform with guardrails give workers a safe working area over ladders and has the same footprint area as a standard 10 ladder. Being electric powered means it's environmentally friendly, no emissions and virtually no noise therefore able to work indoor or out. Includes: cord extension, outrigger base, extra skid bars, cross braces. Deck capacity 500 lbs

Item	Description	Attributes
14-1746	Model M	Walkboard height adjusts from: 24" – 60" Overall dimensions: 31" x 60"
