

**Item P12-0953**

**PRO Tone & Probe Kit**

Locate, trace, and identify copper cables with the Amplifier Probe and Tone generator kit. Send a tone on any deenergized copper cables including electrical cables, speaker wires, alarm cables, coax and data cables. RJ-11/12 and F port interfaces. 3 tone settings and adjustable volume on the probe. Alligator clips for testing other de-energized cables. Continuity testing and talk set power settings. Kit includes Amplifier Probe and Tone generator, carrying case, and accessories in a single kit. Both testers use 9V batteries (included).
