

Item P19-1472

Propane Convection Heater

Equipped with a thermo-electric safety valve to shut the gas flow off if the flame ever goes out. The single knob is used to ignite the heater and control the heat from 30,000 to 80,000 BTU. Matchless piezo spark igniter for easy lighting; operates on a 20 lb. propane cylinder. 10-foot hose and regulator.
