

**Item P16-0995**

**Proplex 1200HD FR**

Proplex 1200 is a rigid, flame-retardant, twin-walled product available in sheets. The sheets are lightweight, strong and antistatic making them very versatile temporary protection material for vertical and horizontal surfaces in lieu of Masonite or Plywood. No warping when wet, unlike plywood, requires virtually no maintenance. More cost effective for every project due to speed of installation and extended life. Handles heavy rolling loads and scaffolding. 100% Recyclable, antistatic and flame retardant.
