

Item P15-1646

Red Head C6+ High Strength Epoxy

Red Head C6+ is the highest strength adhesive in our history. Designed for use in the most demanding anchoring applications, the maximum strength of Red Head C6+ is backed by ICC-ES approvals for both concrete and masonry. It is also the only adhesive approved for core-drilled holes in cracked concrete without the use of a roughening tool. At least 25% stronger than the old C6+ formulation for threaded rod in cracked concrete with seismic conditions. Fastest Cure time in its class, curing in just 2.75 hours at 90°F and in only 2 hours at 110°F! ICC-ES approved for cracked concrete and seismic applications (ICC-ES ESR 4046). Can be used down to 40°F and up to 110°F. Can be used in oversized holes. Rugged cartridges resist breakage due to rough handling or cold temperatures. 24-month shelf life.
