

**Item P11-6639**

**Reed Combo Roll Groover**

Save time and money with this 2-in-1 service tool. Changes in minutes from power machine operation to manual or back. Forms standard roll grooves in steel, stainless steel, and aluminum pipe from 1 1/4" to 6". Adjust the depth of the groove to comply with specifications required for mechanical coupling systems. Compact lightweight design. Built in handle for easy transporting and mounting. Gears enclosed in the casting to minimize any debris from entering the tool. Consistent tracking makes this tool a great performer time after time.
