

Item P13-0069

Ridgid B-500 Transportable Pipe Beveler

The B-500 Transportable Pipe Beveler produces high quality bevels in 45 seconds* without flames or sparks. (*Timed on a 10" Schedule 40 Pipe Speed). The compact design quickly mounts to pipe 4" and up with a maximum wall thickness of 1/2", and creates consistent bevels in a single pass. Set-up and bevel 10" diameter schedule 40 pipe in 45 seconds and the pipe is cool to touch immediately following bevelling. Accurate bevel angle around diameter of the pipe allows for optimal number of cover passes. Adjustable land width from 0" to 3/16" to fit welders' requirements. Produces a machined finish due to 6 replaceable cutter inserts working simultaneously. Fast to set-up and operate. Patent-pending clamp system firmly secures tool to the pipe.
