

**Item P13-0013**

**Ridgid Super-Freeze Machine**

Ridgid SuperFreeze® Pipe Freezer is an easy-to-use pipe freezing unit that allow the contractor to keep water systems operating while making repairs. The RIDGID® SF-2500 is a mini-refrigeration unit that circulates self-contained refrigerant to its aluminum freeze heads. This will form an ice plug in as little as 5 minutes in copper tube up to 2 1/2 and steel pipe up to 2 for the SF-2500. Once the pipe is plugged, repairs can be made with no fear of the ice plug melting because the unit remains on. No need to shut off the water supply or drain a system to make repairs. SuperFreeze® is safe because it eliminates the use of CO2, nitrogen, or illegally releasing refrigerants. SuperFreeze® is portable in a lightweight, compact design. Stainless steel carrying case included. 54 lbs.
