

Item P11-6207

Ridgid Tristand Chain Vise (2 1/2" Capacity)

Ideal for pipe applications ranging in size from 1/8" through 2 1/2". The work surface is equipped with two tool holders. The compact size also allows the vise to easily be stored in service trucks. The integral handle makes transporting easy. It also allows for opening and closing the unit in one simple motion. At only 30 lbs, the new Model 425 is over 25% lighter than its 6" Model 460 counterpart. The exclusive bent legs are designed to increase stability where needed. The self-locking latch automatically engages when closing the stand. This added convenience eliminates the need for a leg chain.
