

**Item P25-0450**

**Airetrex 365 Air Sanitizer**

Sanitizing surfaces is only half of the battle against the spread of bacteria and viruses, that's why hospitals routinely use ultra-violet light technology to disinfect patient areas. The Airetrex 365 is designed to move air around a powerful UV-C light to destroy contaminants in the air such as allergens, bacteria, germs, mold spores and viruses that standard HEPA-style air filters often miss. Now, pathogens have nowhere to hide. Using the energy of a 40-watt bulb, the Airetrex 365 works quietly in the background all day long, taking pathogens out of the air without taking up your time.

Item	Description	Attributes
25-0450	Airetrex 365 Air Sanitizer	
25-0451	UV-C Light Replacement Bulb	
25-0452	Washable Filter
