

**Item P12-1470**

**Site Drainer™ 300**

Fully assembled, ready to use; offers drop and go, no-clogging performance. Rugged, corrosion-proof thermoplastic casing is completely submersible. Features a built in float and check valve. ¼ hp motor with a 15' power cord with 3 prong grounded plug. Two position switch: Manual or automatic operation; auto on at 6"/Auto off at 2" or run manually. Includes two threaded plastic adapters for use with 3/4" garden hose or 2" flat hose. Bright orange color is easy to see for safety purposes and includes a slot for pole and flag (not included). Internal pump is UL-certified and CSA listed. Weighs only 14.2 lbs.

Site Drainers™ patented "free flow design cylinder" technology is unlike that of any other electric submersible dewatering pump on the market. Where other pumps will fail Site Drainers™ allows the water to continue to flow freely even after a solid particle barrier is created. It simply will not clog.
