

**Item P10-2465**  
**Squids Tool Lanyard - Double-Locking Swivel Carabiner and Loop - 40lbs**

The advanced technical design of the Tool Lanyard uses a heavy-duty, single-length, non-shock absorbing webbing. On one end of the Lanyard, there's a double-action locking carabiner that swivels, and on the other, there's a treaded loop for secure attachment. The double-action locking carabiner features a captive eye for maximum security. Single-length construction eliminates weak points. Designed to be attached to the structure being worked on instead of the worker.
