

Item P10-0609

Storagemaster® Chests

Storagemaster® Chests feature 11 inch wide shelves with a 2 1/2" lip that is strong enough for heavy loads. Bi-fold cover folds completely out of the way for unrestricted access. There is a shield that protects the gas spring from tools and debris for long lasting operation. Heavy 12 gauge channel along the front edge of cover interlocks with front edge of chest to form mating cover to body design that resists pry bar entry and keeps weather out. Full length, stacked piano hinge with the ends of the pins welded to resist "knock out". Flanges are stitch welded the entire length, including at the ends. Three inch high, 12 gauge skids raise the unit for fork lifting and are pre-punched for installation of casters. Watchman® IV Lock System standard with each model; only 1 padlock required (Masterlock #1 or #5).

Recommended [Caster Set: 5"](#), [Caster Set: 6"](#) or [Caster Set: 6" Heavy Duty](#).
