

Item P16-9012
Sumner Hold-Down Device

Similar in operation to a chain vise for pipe, the Hold-Down Device uses high tensile strength chain to grip material in a vee-jack style pipe stand. Holds pipes, shapes and solids up to 12" in diameter. (Chain Extension Kit available for sizes up to 48"). Prevents material from moving or rolling out of the vee-head. Quick action locking feature allows set up in seconds. Ideal for fitting up flanges, fittings or valves.
