

Item P15-1611

Viper 4 Overhead Tool

This unique tool has been specifically designed for overhead fastening and acoustical applications. The new Ramset® VIPER4 .27 Caliber Strip Powder Tool design makes overhead applications even easier. The Viper is durable, lightweight and easy-to-use. The load advance is now located internally to allow a push / sleeve actuated operation. **Compatible with the newly designed poles**, the rear collar is connected by set screw to avoid a manual tightness check. Automatic load advance means that the load is advanced consistently each time the Viper is fired. Automatic Piston return mean that no time spent manually resetting or cycling the tool which allows the user to work faster. A heavy duty buffer system prevents front end damage cause by piston overdrive, especially through sprayed-on insulation. The open ended muzzle with oversize exhaust slots results in a cleaner and cooler operation. Offers a simplified barrel retention collar; no tools are required for assembly or disassembly. **Viper4 uses the new pole system for greater ease and accuracy.**

Item	Description	Attributes
