

**Item P14-0953**

**Water Diverter Tarp**

The perfect temporary solution for roof leaks. The Water Diverter is made of an industrial grade vinyl reinforced material, and has a heavy duty garden hose attachment permanently fastened into the center of the product. Heavy duty brass grommets allow the Diverter to be fastened below the ceiling, so water can be diverted through a standard garden hose to a window, drain, sink, or pail.
