

**Item P12-2670**

**XPOWER LGR Dehumidifier with Automatic Purge Pump**

LGR Dehumidifier includes a fully assembled fold-down handle with wheels to simplify the transportability of this lightweight dehumidifier. Auto purge pump with drainage hose automatically purges when full: eliminating the task of monitoring collection tank levels. Automatic speed control increases or decreases the fan speed based on the relative humidity and ambient temperature levels in the space requiring dehumidification. Water removal capacity: 85 pints/day at AHAM (80°F, 60% RH); 145 Pints/Day at Saturation (90°F, 90% RH). LGR performance with operating range between 33°F – 105°F. Optimal dehumidification process with low efficient 6.7 Amps draw. 180 CFM of warm, dry air passes through the exhaust to help optimize drying capability. Dual intake technology and digital display monitors current humidity and operating time. Durable and rugged roto-mold housing that features a nested stacking design. 25' Power cord and 40' long drain hose. Model: XD-85L2-Blue.
