

Item P14-2506

Yodock® Barricade Longitudinal Channelizing Device

The Yodock® Barricade is a plastic, water-filled Longitudinal Channelizing Device used for traffic and pedestrian channelization, road and street closures and perimeter fencing. Lightweight design enables convenient positioning by hand, no heavy equipment required. Stackable for efficient transportation and storage. Patented forklift access for maneuverability. Fill caps and separate drain plugs for easy setup. May be anchored to the roadway surface using bolts. FHWA & DOT Approved for lane separation.
