

Item P11-8010
Bosch Green and Red Beam Line Laser Receiver

The Bosch LR8 Line Laser Receiver allows user to receive the line farther, with precision. It works with green-beam and red-beam lines. The LR8 works outdoors, features an oversized receiver for fast reception and finding the center line, and can catch beams midair. The oversized backlit LCD display offers easy viewing. The dual-sided LED arrow indicators make the receiver more flexible. It has a volume-adjustable audio signal, built-in heavy-duty magnets that securely attach to metal surfaces, and a click-in mounting bracket for leveling rods.
