

Item P89-2225

Bostitch STRAPSHOT Metal Connector Nailer

The Bostitch STRAPSHOT Metal Connector Nailer is the perfect tool for all types of metal connectors. Its exposed nail tip places the fastener point directly into connector holes for a faster, more precise application. It has a built in safety that prevents the tool from firing when not placed properly into the connector hole. The Bostitch STRAPSHOT Metal Connector Nailer drives 1-1/2-inch, 35 degree Paper Tape Metal Connector Nails to secure any type of metal connector plate. These nails come specially hardened to ensure that if there is a misfire it can still drive through the metal connector plate safely. At only 10-1/2" in height and lightweight at 4.6 lbs; compact design fits easily into hard to reach spaces including 12 inches on center studs. Lightweight design offers reduced fatigue and added maneuverability. The tool also comes with hardened steel wear guards to protect the tool and adjustable exhaust to conveniently direct air away from the use.

Specifications
