**Brute Platinum® Drills**

For drilling stainless steel, titanium alloys, and other hard to drill materials, the Brute Platinum® will drill faster, and last longer than any other jobber drill. Manufactured from a premium grade of molybdenum high speed steel and then treated with an exclusive NOMO® nitride, this bit will hold a sharp cutting edge and have less tendency to snap under pressure when others have failed. Precision ground 135° split point eliminates the need for pilot hole drilling and prevents "walking" on slick surfaces such as stainless steel.

Brute Platinum® drill bits are available in standard Jobbers Length, or Mechanics Length. Mechanics Length drills have a reduced overall length which adds strength and rigidity, resulting in less breakage. Mechanics Length also has a flatted shank for positive grip in keyless chuck tools.
